

SIMPLE VERSATILE POWERFUL

discover the power of electronics...

EFFICIENCY AND PRECISION

Lince allows you to reset a large range of ECUs.

With our product you'll be able to fix numerous problems related to the evolving market of the automotive electronics.

You will repair cars saving genuine parts costs, and be able to execute specific functions for the best assistance to your customers:

- Immobilizer reset
- Read security code
- Direct access to the ECU internal memory for fixing even difficult cases.
- Mileage and VIN change for doing the job in professional fashion.

Within the single ECU drivers you'll find also specific extra functions for a complete service.

SIMPLICITY AND SPEED

The job can be performed directly through the OBD connector or inside your electronics lab.

The whole thing is managed from a simple and intuitive graphical user interface, compatible with Windows 2000, XP, Vista, Seven.

The performance is warranted by the USB2.0 connectivity and the support to the CAN BUS protocol.

INTERNET UPDATES

Keep updated with the latest technologies and new car models directly from your office.

Visiting our web site you'll be able to buy the latest news.
